

Fourteen crew. Three weeks of hours-of-rest forms. One *highlighter.*

The compliance audit. Done by hand, at the helm desk.

The chief officer checks each row by hand.

Green ticks. Red question marks. Forty minutes to find what is missing.

Every PMS shows what was signed.

None of them show who has not.

By Monday the inspection has arrived.

The gap is whatever the highlighter missed.

The records do not need to be reached. They need to announce themselves.

Who hasn't signed?
